Boolean Algebra is the mathematics we use to analyse digital gates and circuits. We can use these “Laws of Boolean” to both reduce and simplify a complex Boolean expression in an attempt to reduce the number of logic gates required. Boolean Algebra is therefore a system of mathematics based on logic that has its own set of rules or laws ...

Rule in Boolean Algebra. Following are the important rules used in Boolean algebra. Variable used can have only two values. Binary 1 for HIGH and Binary 0 for LOW. Complement of a variable is represented by an overbar. Thus, complement of variable B is represented as \bar{B} . Thus if $B = 0$ then $\bar{B} = 1$ and $B = 1$ then $\bar{B} = 0$.
