Study & master economic and management sciences grade 8 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in economic and management sciences.

Motivation makes all the difference. And what's more motivating than the expectation of success? The instructions are clear and to the point, so students can quickly get down to writing practice in these 64-page worktexts. Helpful prompts pack the worktext lesson pages including illustrations, examples, and sample responses. Sample Content: book and movie reviews, travelogue, a character sketch, fashions.

Providing complete, step-by-step coverage of the Edexcel GCE Physics specification, this is the official Student Book for the concept-led approach to the specification. Written by experienced examiners, it offers students motivating and relevant content to improve exam performance and ensure students fulfil their full potential. *Allows for regular testing and exam preparationwith real Edexcel past questions, provided in the 'Examzone' sections. *Supports independent learningthrough a range of additional resources provided on the ActiveBook CD-ROM, included FREE in the back of each book. *Helps students build a wide range of skills, including data analysis, critical evaluation of information, communication and collaborative work. *Gives students an in-depth, scientific understandingof the principles covered in each topic, including How Science Works. *Helps students easily see how content from the specification is coveredthrough topic overview maps. *Written by highly respected and experienced authors.

Authored by the National Association of EMS Educators (NAEMSE) in partnership with leading experts in the EMS field, FOUNDATIONS OF EDUCATION: AN EMS APPROACH provides new and practicing instructors EMS specific tools and techniques to design, deliver and evaluate learning. Focused on enhancing the learning experience, this book guides instructors to legally and ethically write objectives, prepare lesson plans, evaluate learning, and deliver education in the classroom, field, and clinical settings. In addition, FOUNDATIONS OF EDUCATION: AN EMS APPROACH provides the groundwork from which instructors and program directors can work collaboratively to develop instructionally sound education programs that meet the National EMS Education Standards, and exceed State and National Accreditation requirements. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Effective science teaching requires creativity, imagination, and innovation. In light of concerns about American science literacy, scientists and educators have struggled to teach this discipline more effectively. Science Teaching Reconsidered provides undergraduate science educators with a path to understanding students, accommodating their individual differences, and helping them grasp the methods—and the wonder—of science. What impact does teaching style have? How do I plan a course curriculum? How do I make lectures, classes, and laboratories more effective? How can I tell what students are thinking? Why don't they understand? This handbook provides productive approaches to these and other questions. Written by scientists who are also educators, the handbook offers suggestions for having a greater impact in the classroom and provides resources for further research.

Study & master economic and management sciences grade 9 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in economic and management sciences.

This books is a great resource for students who are planning to appear for the CogAT test for getting into Grade 7 or Grade 8. This book also includes useful tips for preparing for the CogAT test. Tips are available for each section that will help test takers deal with complex strategies associated with each section. This books has one full length test similar in format to the actual test that will be administered in the CogAT Test. This test has been authored by experienced professional, verified by educators and administered to students who planned on appearing for the CogAT test.

In the past decade, few subjects at the intersection of medicine and sports have generated as much public interest as sports-related concussions - especially among youth. Despite growing awareness of sports-related concussions and campaigns to educate athletes, coaches, physicians, and parents of young athletes about concussion recognition and management, confusion and controversy persist in many areas. Currently, diagnosis is based primarily on the symptoms reported by the individual rather than on objective diagnostic markers, and there is little empirical evidence for the optimal degree and duration of physical rest needed to promote recovery or the best timing and approach for returning to full physical activity. Sports-Related Concussions in Youth: Improving the Science, Changing the Culture reviews the science of sports-related concussions in youth from elementary school through young adulthood, as well as in military personnel and their dependents. This report recommends actions that can be taken by a range of audiences - including research funding agencies, legislatures, state and school superintendents and athletic directors, military organizations, and equipment manufacturers, as well as youth who participate in sports and their parents - to improve what is known about concussions and to reduce their occurrence. Sports-Related Concussions in Youth finds that while some studies provide useful information, much remains unknown about the extent of concussions in youth; how to diagnose, manage, and prevent concussions; and the short- and long-term consequences of concussions as well as repetitive head impacts that do not result in concussion symptoms. The culture of sports negatively influences athletes' self-reporting of concussion symptoms and their adherence to return-to-play guidance. Athletes, their teammates, and, in some cases, coaches and parents may not fully appreciate the health threats posed by concussions. Similarly, military recruits are immersed in a culture that includes devotion to duty and service before self, and the critical nature of concussions may often go unheeded. According to Sports-Related Concussions in Youth, if the youth sports community can adopt the belief that concussions are serious injuries and emphasize care for players with concussions until they are fully recovered, then the culture in which these athletes perform and compete will become much safer. Improving understanding of the extent, causes, effects, and prevention of sports-related concussions is vitally important for the health and well-being of youth athletes. The findings and recommendations in this report set a direction for research to reach this goal.
