Financial Accounting and Reporting is the most up to date text on the market. Now fully updated in its fourteenth edition, it includes extensive coverage of International Accounting Standards (IAS) and International Financial Reporting Standards (IFRS). This market-leading text offers students a clear, well-structured and comprehensive treatment of the subject. Supported by illustrations and exercises, the book provides a strong balance of theoretical and conceptual coverage. Students using this book will gain the knowledge and skills to help them apply current standards, and critically appraise the underlying concepts and financial reporting methods.

Comprehensive outline on Income Tax law with detailed explanations of relevant law, capsule summary, and exam tips.

This analytical study examines the function of internal auditing from the viewpoint of its role within organizations and within the economics of societies and governments. Swanson and Marsh place internal auditing in the context of the scientific conceptual framework of Living Systems Theory, and thus provide a basis for a systematic theoretical framework and a theory based on observable, measurable entities. They identify the advantages of using this system to advance the knowledge and understanding of organizations, and also propose a higher level of internal audit functions that can advance modern societies.

Have you ever thought about learning how to make your computer do what you want it to do? Do you want to learn to program but just don't know where to start? Have all other learning resources got you confused with over explanations, rather than walking you in the right direction? Don't worry, you have to look no further. Written by not just an ...

What is the business model for low-cost airlines? What can a SWOT analysis teach us about the beer war in South Africa? How does changing labour legislation affect staffing decisions. Business cases 2e is a case study book which is complementary to the Introduction to Business Management product suite (including Multiple Choice Questions for Introduction to Business Management). The cases illustrate how business management theory is applied to local organisations. This holistic approach exposes students to the important aspects of owning and managing a business, especially in the South African context. Business cases 2e is written for first-year Business Management students who are studying towards a degree or diploma. It may be used to accompany any introductory business management textbook.

This is a solid foundational undergraduate text written from a fresh and innovative perspective. The text is divided into ten sections covering various key theoretical areas in psychology. There are 41 chapters written by contributors representing universities across South Africa and in the United States and UK. A golden thread narrative is written by psychologist, Kerry Gibson, at the beginning of each chapter, linking the concepts explained to the southern African scenario.

"Given the common acknowledgement that strategy implementation is the greatest challenge to managers in the 21st century and the greatest reason for strategy failure we decided to focus on strategy implementation. Rather than promoting the unrealistic idea of strategy as a purely rational and deliberate outcome, this book acknowledges and explores the idea that strategy is often emergent, messy and experimental and features a number of new chapters, focusing on strategy implementation and change management, resource allocation and responsible leadership. It also includes a more detailed coverage of managing strategic risk."--Publisher's description.
