In Bangladesh, IFPRI has received support from USAID through its Policy Research and Strategy Support Program in Bangladesh (PRSSP) to work in the geographic areas targeted by Feed the Future interventions (known as the Zone of Influence) to construct this new WEAI4VC module. The qualitative research study, conducted by IFPRI field officers, complements a 1,200 household quantitative survey, looking in greater depth at the individual, household, and community level experiences of men and women to understand the consequences of value chain participation on them as producers, entrepreneurs, and wage workers on women's empowerment. The quantitative study sampled 400 households for each of the three economic activities of interest – (1) agricultural production, (2) agricultural entrepreneurship, and (3) agriculture sector employment. It was carried out in ten administrative units (upazilas or sub-districts), and five villages in each upazila to total 50 villages.

The Jurist Ebu's-su'ud (c1490-1574) occupies a key position in the history of Islamic Law. He was a scholar who, for forty years, occupied successfully the senior judicial positions in the Ottoman Empire. Confronting the problem of reconciling classical Islamic jurisprudence with the day-to-day legal needs of an empire, he earned an enduring reputation as the jurist who harmonised the Holy Law of Islam with secular practice. The book examines the substance of this reputation by showing, through Ebu's-su'ud's writings, how he adapted classical Islamic legal doctrine to contemporary needs.
