Teaching Lab Science Courses Online is a practical resource for educators developing and teaching fully online lab science courses. First, it provides guidance for using learning management systems and other web 2.0 technologies such as video presentations, discussion boards, Google apps, Skype, video/web conferencing, and social media networking. Moreover, it offers advice for giving students the hands-on “wet laboratory” experience they need to learn science effectively, including the implications of implementing various lab experiences such as computer simulations, kitchen labs, and commercially assembled at-home lab kits. Finally, the book reveals how to get administrative and faculty buy-in for teaching science online and shows how to negotiate internal politics and assess the budget implications of online science instruction.

AudioLearn's college level courses presents Microbiology. Developed by experienced professors and professionally narrated for easy listening, this course is a great way to explore the subject of college-level Microbiology. The audio is focused and high-yield, covering the most important topics you might expect to learn in a typical undergraduate Microbiology course. The material is accurate, up-to-date, and broken down into bite-size chapters. There are key takeaways following each chapter to drive home key points and quizzes to review commonly tested questions. Observing Microorganisms Cell Basics Acellular Pathogens Types of Prokaryotic Cells Types of Eukaryotic Cells The Biochemistry of Microbiology Metabolic Processes in Microbiology The Genome in Microbiology Microbial Genetics Microbial Growth Antimicrobial Agents Pathogenicity and Disease Innate Immune System Adaptive Immune System Advanced Laboratory Methods We will conclude the course with a 200 question practice test.

This text utilizes the organ system approach and emphasizes the relevance of microbiological principles to human health, as well as providing a historical background. There are chapter-specific study cards included that feature key diseases and microorganisms.

The Third Edition of Biology: Science for Life with Physiology continues to draw readers into biology through engaging stories that make difficult topics more accessible and understandable. Colleen Belk and Virginia Borden strive to make teaching and learning biology a better experience from both sides of the desk. The authors draw from their teaching experiences to create a bookwith a flowing narrative and innovative features that require readers to become more active participants in their learning. Each chapter presents the material through a story that draws from real life examples, making the reading more engaging and accessible to today's readers. These stories strive to demystify topics found in biology. Can Science Cure the Common Cold? Introduction to the Scientific Method, Are We Alone in the Universe? Water, Biochemistry, and Cells, Diet. Cells and Metabolism, Life in the Greenhouse: Photosynthesis Cellular Respiration, and Global Warming,Cancer: DNA Synthesis, Mitosis, and Meiosis, Are You Only as Smart as Your Genes? Mendelian and Quantitative Genetics, DNA Detective: Complex Patterns of Inheritance and DNA Fingerprinting, Gene Expression, Mutation and Cloning: Genetically Modified Organisms, Where Did We Come From? The Evidence for Evolution, An Evolving Enemy: Natural Selection, Who Am I? Species and Races, Prospecting for Biological Gold: Biodiversity and Classification, Is the Human Population Too Large? Population Ecology,Conserving Biodiversity: Community and Ecosystem Ecology, Where Do You Live? Climate and Biomes, Organ Donation: Tissues, Organs, and Organ Systems, Clearing the Air: Respiratory, Cardiovascular, and Excretory Systems, Will Mad Cow Disease Become an Epidemic? Immune System, Bacteria, Viruses, and Other Pathogens, Sex Differences and Athleticism: Endocrine, Skeletal, and Muscular Systems, Is There Something in the Water? Reproductive and Developmental Biology, Attention Deficit Disorder: Brain Structure and Function, Feeding the World: Plant Structure and Growth, Growing a Green Thumb: Plant Physiology.Intended for those interested in learning the basics of biology.

With the increasing focus on science education, growing attention is being paid to how science is taught. Educators in science and science-related disciplines are recognizing that distance delivery opens up new opportunities for delivering information, providing interactivity, collaborative opportunities and feedback, as well as for increasing access for students. This book presents the guidance of expert science educators from the US and from around the globe. They describe key concepts, delivery modes and emerging technologies, and offer models of practice. The book places particular emphasis on experimentation, lab and field work as they are fundamentally part of the education in most scientific disciplines. Chapters include: * Discipline methodology and teaching strategies in the specific areas of physics, biology, chemistry and earth sciences. * An overview of the important and appropriate learning technologies (ICTs) for each major science. * Best practices for establishing and maintaining a successful course online. * Insights and tips for handling practical components like laboratories and field work. * Coverage of breaking topics, including MOOCs, learning analytics, open educational resources and m-learning. * Strategies for engaging your students online. A companion website presents videos of the contributors sharing additional guidance, virtual labs simulations and various additional resources.

A discussion of the constitutional jurisprudence of an important Egyptian jurist of the M lik school, Shih b al-D n al-Qar f .

Questions regarding the orthodoxy of Dale Moody and Ralph Elliott propelled the Southern Baptist Convention (SBC) toward a re-evaluation of its doctrinal statement, the Baptist Faith and Message (BFM). The SBC adopted this document in 1925 under the leadership of E. Y. Mullins when faced by the challenge of modernism. This dissertation argues that the 1962 Committee on Baptist Faith and Message produced a document that expressed subtle shifts in Baptist theology. This shift had the effect of assuring the conservative base while allowing enough latitude in interpretation for those serving in the academy to teach more "progressive" views. After a first, introductory chapter, chapters 2 and 3 trace the historical developments leading to the formation of the Committee. Biblical inspiration and interpretation were key concerns, but as chapter 3 demonstrates, other concerns drew the attention of the Committee. Chapters 4 and 5 deal with the ever-sensitive issue of the relationship between Baptist confessionalism, soul liberty, and soul competency. Each chapter examines how Baptist confessionalism functioned in relation to these concepts. Chapter 6 examines in detail the work of the Committee itself and looks at those persons or groups who influenced the outcome of the Committee's work. Of special note are the contributions made by Wayne Ward, Leo Garrett, the religion faculty of Mercer University, and the theology faculty of Southern Seminary. Chapter 7 examines four areas where the 1963 BFM altered the confessional expression of Baptist doctrines: (1) Scripture; (2) Man; (3) Salvation; (4) The Church. Chapter 8 is the conclusion. Four appendices contain early drafts of the Committee's work.
