The Certified Provider Credentialing Specialist Passbook(R) prepares you by sharpening the skills and abilities necessary to succeed on your upcoming entrance exam.

The Medical Staff Services handbook is the most comprehensive educational resource available for medical staff services departments. More than an introductory text it covers all department functions and offers practical advice on managing the credentialing and privileging process. This indispensable book can be used as a training tool for students, new employees, and physician leaders; as an on-the-job reference for medical staff services professionals; and as a guide to standardizing department processes. This second edition offers new information on the professional practice evaluation process. It addresses healthcare accreditation programs and hospital functions such as the institutional review board, cancer programs, and accredited continuing medical education programs. Helpful guidance on healthcare technology and legal issues is also included. Students who will be taking the NAMSS exam will find this handbook an ideal preparation tool.

The Certified Provider Credentialing Specialist Passbook(R) prepares you by sharpening the skills and abilities necessary to succeed on your upcoming entrance exam.

Whether You Are An Expert In Medical Staff Services Or A Student Just Starting Out, This Book Provides Solutions To The Most Common Dilemmas. This Guide Provides A Comprehensive Look At All Major Functions Performed In A Medical Staff Services Department. It Contains Practical Advice On Organizing Medical Staff, Carrying Out Procedures, And Resolving Problems Related To Credentialing And Privileging.

Credentialing for Managed Care: Compliant Processes for Health Plan and Delegated Entities Amy M. Niehaus, CPMSM, CPCS, MBA New to managed care credentialing? Whether you work for a health plan or a hospital medical staff services department, this how-to guide answers all of your health plan credentialing and enrollment questions. Learn the regulatory and accreditation requirements related to managed care credentialing, including those from CMS, NCOA, and URAC. Author Amy M. Niehaus, CPMSM, CPCS, MBA, provides readers with the guidance to create a comprehensive and compliant credentialing program to support your health plan or to streamline your hospital's provider enrollment process through delegation. MSPs in all healthcare environments can benefit from understanding credentialing in the managed care world to support their organizational goals of compliance, operational efficiency, cost savings, and practitioner satisfaction. This book will help you: * Understand NCOA, URAC, and CMS requirements for health plans * Develop a comprehensive and compliant managed care credentialing program * Establish delegated credentialing agreements * Audit credentialing files * Recognize how payer credentialing requirements impact other healthcare organizations * Streamline provider enrollment through delegation * Identify the differences between hospital and managed care credentialing * Evaluate whether a credentials verification organization is right for your organization About the author: Amy M. Niehaus, CPMSM, CPCS, MBA, is a consultant with The Greeley Company, an industry-leading healthcare consulting firm. She has over 25 years' experience in the medical services and credentialing profession. In her current role, she advises clients in the areas of accreditation, regulatory compliance, credentialing, process simplification and redesign, credentialing technology, and credentials verification organizations (CVO) development and delegation. Niehaus has worked in multiple environments throughout her career, including acute care hospitals, CVOs, and managed care organizations (MCO). She has been a member of the National Association Medical Staff Services (NAMSS) since 1991 and achieved her CPMSM certification in 1992 and her CPCS certification in 2002. Niehaus is a NAMSS instructor and previously served as chair of its MCO Task Force, as well as chair and member of the NAMSS Education Committee. She is a former president of the Missouri Association Medical Staff Services and its greater St. Louis area chapter. Niehaus holds a bachelor's degree from the University of Missouri and a master's degree in business administration from Maryville University in St. Louis. Niehaus has developed and presented various programs to local and national audiences on topics such as credentialing and privileging processes, Joint Commission, National Committee for Quality Assurance (NCOA), and URAC accreditation standards; and delegation.

A historical tradition of Roman origin represents Livia Drusilla, the third and much beloved wife of Caesar Augustus, as a conniving, Borgia-like criminal. This view of Livia maintains, that to promote the political career of her son by her former husband, Livia killed or incapacitated Augustus' descendants through his previous wife. Author Robert Graves, in his famous novel, I, Claudius, based his fictitious rendering of Livia upon this malevolent representation of her. The conceit is patently wrong, and essentially all modern scholars of Roman history reject it. But thanks to Graves' immensely entertaining book, and the British Broadcasting Corporation adaptation of it for television, the image of Livia as a devious dynastic murderess prevails in the popular mind. I, Livia: The Counterfeit Criminal aspires to correct the misconception, and present an accurate assessment of this much-maligned woman. The study's comfortably readable style is intended for general audiences. The first three chapters present a biographical sketch, which focuses on Livia's public life. Livia was accepted as an extraordinarily visible, dynamic and influential political personage, by a society and culture that maintained that women must confine their activities childrearing and other domestic pursuits. The following two chapters demonstrate the absurdity of Livia's criminal reputation, and offer explanation for its development. Three subsequent chapters seek Livia's private side - her habits, tastes, and interpersonal relationships. Livia (who suffered from colds and chronic arthritis) was an amiable soul, with a self-deprecating sense of humor. She was a loving, supportive forbearant wife and mother, an intellectual with profound political insights, an enthusiastic traveller, a connoisseur of art. Although generally patient and demure, she could also be impulsive, assertive, opinionated and, especially in later life, petulant. The final chapter examines how Livia became, and remained, a symbol of Roman imperial power. The brief epilogue describes the physical appearances of Livia and the members of her family. Also included are relevant appendices, a comprehensive bibliography, and color images of surviving wall paintings from her homes.

The Medical Staff Professional's Handbook The essential medical staff professional's job manual Let your experienced peers provide you with the guidance and training you need to tackle your toughest challenges."The Medical Staff Professional's Handbook" is a comprehensive job manual developed by medical staff professionals (MSPs) Anne Roberts, CPMSM, CPCS, and Maggie Palmer, MSA, CPMSM, CPCS. This program has been approved by the National Association Medical Staff Services for up to 3.0 continuing education unit(s). Accreditation of this educational program in no way implies endorsement or sponsorship by NAMSS. Navigate credentialing standards faster and easier. Order your copy today.

This handbook enables your organization to systemize the tedious, ongoing, and mandatory process of credentialing your medical staff and to understand why you must! Healthcare organizations must have credentialed medical staffs to deliver their services. The reasons are two-fold: First, educated, licensed, experienced, and proven caregivers ensure that a hospital or medical practice is capable of delivering quality care. Secondly, payers require that the physicians and other licensed healthcare professionals are qualified and licensed to work with their patients. Before receiving payment for services, the provider must have specific credentials for providing that service. Verifying and documenting the credentials of a healthcare provider is tedious, ongoing, and mandatory. An organization with a large medical staff may struggle with keeping the credentialing function current, as many licenses have rolling expirations. Credentialing ensures that clinical practitioners are duly qualified, licensed, and board certified. It reports the history of malpractice claims, state-instituted sanctions, or other undesirable professional circumstances of providers. Credentialing and privileging of healthcare professionals protects patients and hospitals by minimizing the risk of medical errors that may result from the work of incompetent providers. It also undergirds the reputation and credibility of the institution in the eyes of providers and across the healthcare community. Further, credentialing with insurers forms the basis for reimbursement for professional services. Without the acceptance of the professional credentials of a provider, insurers and other third-party payers will not compensate his or her claims. The purpose of this book is to explain the necessity and to provide the process for the official documentation of each practitioner. The information presented in these chapters will serve as a practical resource for strengthening your organization's credentialing function. = Book Features! -Outlines the necessity for credentialing in the delivery of care and in attaining reimbursements for services provided -Explores options for in-house and outsourced credentialing function -Provides systematic process for ongoing credentialing operations
