Book features and updates to the third edition include: • New chapter on classroom assessment that outlines and compares existing assessment strategies, contextualizes them within the framework of state standards, and articulates a constructivist approach that moves away from traditional high-stakes testing towards more meaningful ways of evaluating student learning • New chapter that highlights and explains key elements of the Common Core State Standards for English Language Arts, and shows how the incorporation of critical ELA instruction into the social studies curriculum can foster more ambitious teaching and learning • Real-classroom narratives that introduce each chapter and provide in-depth access to teaching and learning contexts • Practical curriculum and resource suggestions for the social studies classroom • End-of-chapter summaries and annotated teaching resources

The third edition of this highly regarded collection of social studies activities continues to be based on the premise that children learn best through experiences and activities—learning by doing. It features new activities for each social studies category (geography, history, anthropology, sociology, economics, political science, and interdisciplinary). Three important new additions to the key elements of the easy-to-follow activity format make it easier for instructors to meet standards-based curriculum requirements: A detailed treatment of National Council of Social Studies standards addressed; specific multiple intelligences addressed (also reinforced by a multiple intelligences section in the back of the book); and useful Web site(s) for group/individual research (URLs for sites that will expand or enrich the learning experience for the activity). By engaging pupils in meaningful, worthwhile social studies activities, instructors can emphasize the processes of learning rather than the products, resulting in a richly rewarding experience for pupils and teacher alike.

The author wrote this new edition of the most popular elementary social studies methods text on the market with the following three goals in mind: to present the most powerful social studies content and pedagogy for children in elementary school, to offer the material in simple and accessible ways, and to write in a first person active voice. The purpose of this book is to introduce new teachers to the world of social studies teaching and learning in elementary and middle schools. Geography, history, government and the other social sciences are delivered into the palm of the new teacher ' s hand along with a suite of tools for bringing social studies to life in the classroom. The book is organized into three sections – the first orients the reader to the mission of social studies education to the increasingly diverse children we teach, the second concentrates on the curriculum, and the third deals with instruction, how we plan and teach this curriculum. Three central themes continue to pervade the book – democratic citizenship, diversity, and the social sciences – to ultimately encourage teachers to excite their students about closing the gap between social realities and democratic ideals. An exceptionally strong chapter on multicultural issues (Chapter 2) helps future teachers truly understand the changing demographics of the American classroom.
